

CC matting

Benefits of Effective Entrance Matting:

Increase Public Safety.....

According to the health & safety executive, 90% of slip accidents in public buildings occur on wet floors.

Remove Dirt & Moisture.....

More than 70% of dirt and moisture in buildings is tracked in by pedestrian and wheeled traffic.

An effective matting system can reduce the amount of dirt and moisture tracked into a building by up to 90%, helping to reduce such slip accidents.

Reduce Maintenance Costs.....

On going cleaning and maintenance is the largest cost in the lifecycle of any floorcovering. An effective entrance mat will reduce the amount of dirt that is tracked into a building therefore reducing maintenance costs and increasing the life of a buildings floorcoverings.

CC Matting 3 Zone System.....

Any public entrance to a premise should be broken into 3 zones for the purposes of entrance matting and to compliment the 3 topics we have just discussed.

- ZONE 1 Exterior of any building/doorway.
- ZONE 2 Immediate interior of premises/doorway.
- ZONE 3 Area to follow zone 2.

Zone 1 would usually comprise of a primary barrier matting type matting system to remove excess dirt prior to entering a building using a scraper wiper.

Zone 2 would also comprise of a primary barrier matting system that removes and retains dirt and moisture to prevent ingress to adjacent floorcoverings through a combination of scraper and textile wipers. It is available in a choice of open and closed construction and in different gauges to suit both recessed and surface mounted options. It is available to suit varying types and volumes of traffic.

Zone 3 would comprise of a Secondary Barrier Matting that Removes and retains dirt and moisture to prevent ingress to adjacent floorcoverings. Would often be used in conjunction with Zone 2 primary entrance mats to create additional protection for surrounding floorcoverings. Can, in some circumstances, be used as standalone entrance barrier matting Ideal for use in areas of heavy traffic and heavy wear such as staircases, reception areas, lift lobbies and internal entrances such as factory to office areas etc

CC Matting supply and install every type of entrance matting to cater for all your needs.
